

In re Patent Application of:
BELL ET AL.
Serial No. 10/719,203
Filing Date: **November 21, 2003**

REMARKS

The Examiner is thanked for the thorough examination of the present application. The Examiner is also thanked for the telephonic interview of October 30, 2007 where the present rejections and proposed claim amendments were discussed. In particular, the Examiner agreed that amending the independent claims to recite that the camera is configured to obtain images of the road would define over prior art. As such, to further prosecution, the independent claims have been amended herein accordingly. Support for the amendment can be found in paragraphs 0021-0024 and FIG. 1. No new matter is being added.

Accordingly, amended independent Claims 1, 11, and 19 are patentable over the prior art. Their respective dependent claims, which recite yet further distinguishing features, are also patentable over the cited references and require no further discussion herein. A Notice of Allowance is therefore respectfully requested in due course. Should any informalities need to be addressed, the Examiner is encouraged to contact the undersigned attorney at the telephone number listed below.

Respectfully submitted,

DAVID S. CARUS
